

## When Swelling, Cell-Debris & Pus blocks the wound healing process

# Seradex<sup>®</sup>

## TABLETS

Diclofenac 50mg plus Serratiopeptidase 10mg

### Breaks the barrier in Wound healing...

#### Serratiopeptidase

- Reduces soft-tissue swelling by improving microcirculation
- Allow better penetration of NSAID (Diclofenac) because of fibrinolytic activity
- Dissolves hematoma, cell debris and necrotic tissue by proteolytic activity.

#### Diclofenac

- Produces stronger and faster analgesic actions and reduces inflammation

#### **Dosage**

1 tablet 2-3 times daily after food.

#### **Indications**

##### **Recommend & Rely Seradex in**

Burns, Accidental Injuries, Cuts, wounds  
Orthopedic Surgery & Conditions – Arthritis, fractures  
Surgery - All Post-Operative Inflammation
